Marketing / Overview

24 clean leads | Lithuanian citizenship by descent | Google Ads | All managers | Snapshot 2026-10-21 | All origins

Open-stage snapshot. Closed-won/lost history is absent; conversions and CAC cover this export only.

Leads

24

1 native / 23 migrated

All leads in the current selection, with the chosen filters and cleanup mode.

Relevant strict rate

95.8%

23 relevant / 24 total

Leads marked Relevant / all selected leads. Blank or unrecognized assessments stay in the base.

Assessment coverage

95.8%

1 not assessed

Leads with an explicit relevance assessment / all selected leads. Blank or unrecognized values are unassessed.

Relevant among assessed

100%

23 / 23 assessed

Relevant leads divided only by assessed leads. Blank or unrecognized assessments are excluded from this denominator and available as a separate segment.

Qualified / active rate

41.7%

10 leads

Leads with work, agreement or payment evidence / all selected leads. Relevant alone is insufficient.

Agreement sent / later

0%

0 dated / 0 reached

Leads with agreement or payment evidence / all selected leads. A stage alone does not confirm signing or its date.

Client rate

0%

0 clients; 0 without first-payment date

Leads with payment evidence / all selected leads. Payment status can establish a client even when the first-payment date is missing.

Full-paid rate

0%

0 full-paid clients

Leads with full-payment evidence / all selected leads. Lawyer handover or completion alone is insufficient.

Marketing / Overview

Acquisition economics / Finance + Kommo

2026-09

24 of 24 selected leads matched (100%)

Estimated matched media spend

€3,304

Channel costs / EUR

Sum of finance channel costs allocated to the matched CRM population. Excludes overhead, missing channel costs, incomplete months and partial-month date selections.

CPL / matched leads

€138

24 matched leads

Matched finance media spend / matched CRM leads. Unmatched selected leads do not enter the denominator.

CPQL / matched qualified

€330

10 matched qualified leads

Matched finance media spend / qualified or active CRM leads from exactly the same matched creation months and channels.

CAC / matched clients

n/a

0 matched clients / preliminary

Matched media spend / current clients among matched creation cohorts. This is a preliminary cohort acquisition cost, not the cost of clients paying during this calendar period. Missing closed leads or source mapping can distort it.

Service / manager allocations are estimates based on each channel's monthly lead share. Daily CRM filters remain exact; monthly finance costs are never prorated to days. Revenue and company overhead remain in Finance & reconciliation.

⚠ This export contains no closed-won / closed-lost stages. Historical win rate and rejection rate are unavailable from this snapshot.

5 date values in this selection failed validation and are excluded from time-based calculations. Details are in Quality.

Creation cohorts use the original PlanFix date for migrated leads. Response-time comparisons use native Kommo leads only. Owner means the currently recorded responsible user.

Priority checks

1 leads await assessment

Complete Relevancy before concluding that channel quality has declined.

23 open leads need a next action

Review overdue first contact, tasks and retainer follow-ups in Sales Report.

0 leads lack acquisition attribution

Capture method alone does not establish the advertising source.

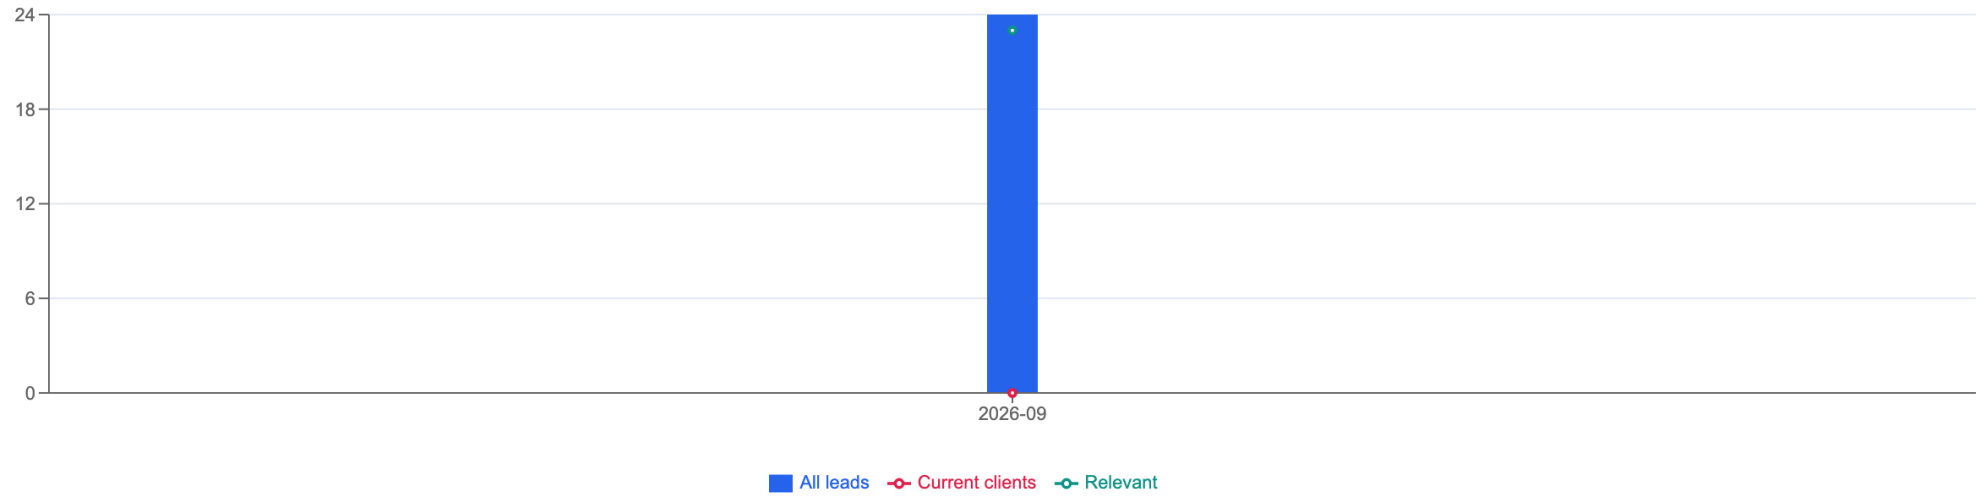

0 clients lack a valid first-payment date

Fill or correct First payment at to make timed payment cohorts complete.

Marketing / Channels & Services

Reading channel relevance

Relevant / all includes unassessed leads in the denominator. Relevant / assessed excludes blank or unrecognized assessments: Relevant / (Relevant + Not Relevant). A channel with no assessed leads shows n/a, not 0%. The small fractions show the exact counts behind each rate.

Meta attribution: Meta ads require explicit paid evidence. Facebook / Instagram chats without that evidence are separate from ads; ambiguous social sources are not treated as paid. A chat can remain the capture method while a confirmed original advertising source is preserved.

Channel performance

Channel	Leads	Relevant / all	Relevant / assessed	Unassessed	Clients	Full paid	Client rate
Google Ads	24	95.8% 23 / 24	100% 23 / 23	1	0	0	0%

De Civitate / Kommo / 2026-09-01 to 2026-09-30

Marketing / Channels & Services

Meta: acquisition source vs form records

Audit across all channels. Service, manager, origin and cleanup settings remain applied. Only the right-hand column removes the creation-date filter.

No Meta submission timestamp is used in this view. Counts follow CRM creation cohorts, not monthly form submissions in Ads Manager.

Evidence	Selected creation dates	All creation dates
Meta Ads: acquisition source	**123**	**913**
CRM leads with a confirmed paid Meta form	**122**	**910**
Unique paid submissions (FB lead ID)	**122**	**904**
Repeated paid form links across CRM leads	**0**	**6**
Paid Meta forms under another acquisition source	**1**	**4**
Meta Ads without confirmed paid form evidence	**2**	**7**
Forms with unknown organic / paid flag	**0**	**0**
CRM leads sharing a Meta ID across different contacts	**0**	**7**

Confirmed paid form means a Facebook lead ID and an explicit false organic flag. Repeated IDs are not additional unique form submissions. Ads without a form ID can be website leads; they are not automatically invalid.

Fields: FB lead id, FB form id, Fb ad id, Fb is organic, source attribution, original CRM creation date.

A Meta ID linked to different emails or phone numbers needs an integration check. This is a potential collision, not proof that the people are duplicates; records are not automatically deleted or reattributed.

Open-stage snapshot: An open-stage-only export can omit rejected or closed leads. Export all stages, all pipelines and the full history to reconcile campaign totals. Missing rows cannot be recovered from this file.

Marketing / Cohorts

24 clean leads | Lithuanian citizenship by descent | Google Ads | All managers | Snapshot 2026-10-21 | All origins

Open-stage snapshot. Closed-won/lost history is absent; conversions and CAC cover this export only.

Cohort event

First payment | **Full payment** | First contact | Agreement sent

Cohort mode

Cumulative conversion, % | Monthly conversions, count

M0 is the creation month; M1 is the next calendar month, not the next 30 days. Example: 10 September leads reach the selected event: 1 in September, 1 in October, 2 in November. Cumulative conversion: M0 = 10%, M1 = 20%, M2 = 40%.

Only actual dated events enter the cells. Leads without an event date stay in the cohort base; current clients are a separate snapshot metric. Future cells are unavailable. The snapshot month is partial; counts may still increase.

Selected leads

24

Original creation month

All leads in the current selection, with the chosen filters and cleanup mode.

Valid event dates

0

Full payment

Selected events with valid dates between the creation day and the snapshot. Stages and payment status never substitute for an event date.

Current paid status

0%

0 clients

Leads with payment evidence / all selected leads. Payment status can establish a client even when the first-payment date is missing.

Paid / first date unknown

0

Clients with payment evidence but no accepted first-payment date. This does not mean no payment occurred.

De Civitate / Kommo / 2026-09-01 to 2026-09-30

2026-09

24 of 24 selected leads matched (100%)

Estimated matched media spend

€3,304

Channel costs / EUR

Sum of finance channel costs allocated to the matched CRM population. Excludes overhead, missing channel costs, incomplete months and partial-month date selections.

CPL / matched leads

€138

24 matched leads

Matched finance media spend / matched CRM leads. Unmatched selected leads do not enter the denominator.

CPQL / matched qualified

€330

10 matched qualified leads

Matched finance media spend / qualified or active CRM leads from exactly the same matched creation months and channels.

CAC / matched clients

n/a

0 matched clients / preliminary

Matched media spend / current clients among matched creation cohorts. This is a preliminary cohort acquisition cost, not the cost of clients paying during this calendar period. Missing closed leads or source mapping can distort it.

Service / manager allocations are estimates based on each channel's monthly lead share. Daily CRM filters remain exact; monthly finance costs are never prorated to days. Revenue and company overhead remain in Finance & reconciliation.

Company finance context & reconciliation

1 finance months overlap the selected creation period. The following company totals include full overlapping calendar months; they are not revenue or costs attributed to the filtered CRM cohort. Service, channel, manager or origin filters affect CRM counts only in the reconciliation below.

De Civitate / Kommo / 2026-09-01 to 2026-09-30

Marketing / Finance & Reconciliation

Marketing cost

€11,162

Finance is monthly, company-wide data. It is not automatically attributed to a manager, country or CRM sale. CRM counts use original creation dates; finance leads can reflect different historical inclusion rules.

Revenue received

€40,424

Cash received in calendar months according to finance, not the contract value of created CRM leads.

Finance Sales

€60,200

Contract value signed in each month according to finance. CRM Sale is separate and its currency is not exported.

Signed contracts

18

Actual signed contract count from Finance, not inferred from Retainer sent.

Revenue / marketing

3.6x

Company finance revenue divided by all marketing expenditure. A blended revenue-to-marketing ratio, not paid-ad attributed ROAS.

Finance CPL

€7

Total marketing spend / finance-reported leads for the same finance months. Not the CPL of a filtered CRM cohort.

Cost / signed contract

€620

Marketing expenditure divided by finance signed contracts in the same calendar months.

CPC (Google + Bing)

€3

Workbook Paid traffic all / workbook total clicks. The supplied workbook total excludes Facebook; its rows are reconciled below.

Direct dates versus proxies (1/2)

Direct date coverage uses all leads in each scope, not an event-eligible conversion denominator. Proxy-only is a separate selected-scope count; a blank timestamp does not prove the event never occurred.

Event date header	Column availability	Selected (24) accepted dates	All supplied (5,459) accepted dates	Selected proxy-only / all selected	Direct / proxy evidence
Date Created / Created on	Primary present; fallback absent	24 / 24 (100%)	5,459 / 5,459 (100%)	Not inferred	Kommo creation/import timestamp; not necessarily original acquisition.
Last Modified / Modified on	Primary present; fallback absent	24 / 24 (100%)	5,459 / 5,459 (100%)	Not inferred	Snapshot modification timestamp; not a stage-change history.
First contact at	Present	17 / 24 (70.8%)	1,672 / 5,459 (30.6%)	7 / 24 (29.2%)	Proxy: contact/qualified stage or downstream evidence; no contact time.
TD_In work	Present	2 / 24 (8.3%)	123 / 5,459 (2.3%)	8 / 24 (33.3%)	Proxy: qualified stage or downstream agreement/payment evidence; no entry time.
Agreement sent at	Present	0 / 24 (0%)	8 / 5,459 (0.1%)	0 / 24 (0%)	Proxy: agreement/client classification; does not prove sending or signature.
Agreement signed at	Unavailable	Unavailable	Unavailable	Not inferred	Direct signature date only. Stage and payment evidence are not signature proof.
First payment at	Present	0 / 24 (0%)	45 / 5,459 (0.8%)	0 / 24 (0%)	Proxy: payment amounts, other payment dates, status or stage; no first-payment time.
Second payment at	Present	0 / 24 (0%)	8 / 5,459 (0.1%)	Not inferred	Direct second-payment date only.
Third payment at	Present	0 / 24 (0%)	3 / 5,459 (0.1%)	Not inferred	Direct third-payment date only.
Full payment at	Present	0 / 24 (0%)	31 / 5,459 (0.6%)	0 / 24 (0%)	Proxy: full-payment status or stage; no full-payment time.
Lawyer handover at	Present	0 / 24 (0%)	4 / 5,459 (0.1%)	Not inferred	Direct handover date only.
TD_Lawyer has completed the work	Present	0 / 24 (0%)	1 / 5,459 (0%)	Not inferred	Direct completion date only.

Rejected dates by field and reason

Selected: 5 rejected values across 5 / 24 leads. All supplied: 411 values across 378 / 5,459 leads. Future means after the snapshot day; before-creation compares UTC calendar days. Scheduled Next Task may be future.

Exact date field	Exclusion reason	Selected rejected values	Selected (24) affected	All rejected values	All supplied (5,459) affected
Agreement sent at	Before effective creation	0	0 / 24 (0%)	1	1 / 5,459 (0%)
First contact at	After snapshot (unscheduled)	3	3 / 24 (12.5%)	237	237 / 5,459 (4.3%)
First contact at	Before effective creation	2	2 / 24 (8.3%)	129	129 / 5,459 (2.4%)
First payment at	After snapshot (unscheduled)	0	0 / 24 (0%)	12	12 / 5,459 (0.2%)
First payment at	Before effective creation	0	0 / 24 (0%)	11	11 / 5,459 (0.2%)
Full payment at	After snapshot (unscheduled)	0	0 / 24 (0%)	12	12 / 5,459 (0.2%)
Full payment at	Before effective creation	0	0 / 24 (0%)	5	5 / 5,459 (0.1%)
Lost at(from Planfix)	After snapshot (unscheduled)	0	0 / 24 (0%)	1	1 / 5,459 (0%)
Lost at(from Planfix)	Before effective creation	0	0 / 24 (0%)	1	1 / 5,459 (0%)
Second payment at	Before effective creation	0	0 / 24 (0%)	2	2 / 5,459 (0%)

Creation-date exclusions

Leads without a usable effective creation date cannot be assigned to a creation-month cohort. This exclusion can overlap the response and date-issue exclusions below.

Group	Selected (24)	All supplied (5,459)	Evidence / interpretation
No usable effective creation date	0 / 24 (0%)	0 / 5,459 (0%)	Excluded from creation-month cohorts and filters requiring a dated creation.

De Civitate / Kommo / 2026-09-01 to 2026-09-30

Marketing / Quality

First-response sample and exclusions

Selected usable response coverage: 0 / 1 non-migrated leads (0%). All supplied: 721 / 2,818 non-migrated leads. Table shares use all leads in each scope, so its five rows sum to the scope total.

Group	Selected (24)	All supplied (5,459)	Evidence / interpretation
Excluded: migration flag	23 / 24 (95.8%)	2,641 / 5,459 (48.4%)	All migrated leads are excluded from first-response SLA, even with dates.
Excluded: no creation date	0 / 24 (0%)	0 / 5,459 (0%)	Non-migrated, without a usable effective createdAt.
Excluded: no contact date	1 / 24 (4.2%)	2,097 / 5,459 (38.4%)	Non-migrated, with creation date but no accepted firstContactAt; not proof of no contact.
Excluded: negative interval	0 / 24 (0%)	0 / 5,459 (0%)	Non-migrated with both dates, but contact time precedes creation time on the same day.
Usable response-time sample	0 / 24 (0%)	721 / 5,459 (13.2%)	Non-migrated, both timestamps accepted, contact minus creation is non-negative.

Migration origin

Migration-flagged: 23 / 24 selected; 2,641 / 5,459 all supplied. Import time is not assumed to be acquisition time.

Group	Selected (24)	All supplied (5,459)	Evidence / interpretation
No migration flag	1 / 24 (4.2%)	2,818 / 5,459 (51.6%)	migrated = false; not independent proof of native acquisition.
Migrated: Old Lead ID only	0 / 24 (0%)	0 / 5,459 (0%)	Migration flag plus filled Old Lead ID; no filled Planfix creation field.
Migrated: Planfix creation only	0 / 24 (0%)	12 / 5,459 (0.2%)	Migration flag plus filled Date Created(from Planfix); no filled Old Lead ID.
Migrated: both origin fields	23 / 24 (95.8%)	2,629 / 5,459 (48.2%)	Migration flag plus both exact origin headers filled.
Migrated: origin fields untraceable	0 / 24 (0%)	0 / 5,459 (0%)	Migration flag is true but neither origin header is in filled.

Source and capture field completeness (2/2)

Direct raw-field coverage; no aliases are silently combined. Legacy Marketing Source may be present even when a higher-priority source wins.

Exact export header	Column	Selected (24) filled	All supplied (5,459) filled
utm_campaign	Present	0 / 24 (0%)	1,336 / 5,459 (24.5%)
FB lead id	Present	1 / 24 (4.2%)	1,916 / 5,459 (35.1%)
FB form id	Present	1 / 24 (4.2%)	1,916 / 5,459 (35.1%)
Fb ad id	Present	1 / 24 (4.2%)	1,915 / 5,459 (35.1%)
Fb is organic	Present	1 / 24 (4.2%)	1,916 / 5,459 (35.1%)
Type	Present	23 / 24 (95.8%)	2,852 / 5,459 (52.2%)

Campaign and medium coverage

Group	Selected (24)	All supplied (5,459)	Evidence / interpretation
Recorded campaign label	19 / 24 (79.2%)	2,650 / 5,459 (48.5%)	Normalized first-touch / UTM / parsed-tag campaign; not proof of a valid campaign ID.
Recorded medium value	18 / 24 (75%)	259 / 5,459 (4.7%)	Nonempty first-touch / UTM medium; not validation of paid versus organic classification.
Legacy Marketing Source cell filled	23 / 24 (95.8%)	4,224 / 5,459 (77.4%)	Direct cell presence; distinct from sourceMethod = Marketing Source.

De Civitate / Kommo / 2026-09-01 to 2026-09-30

Marketing / Quality

Data-derived follow-up

Counts refer to the selected scope unless explicitly stated otherwise.

Follow-up	Observed evidence and denominator
Include missing critical columns in the export	1 / 44 monitored exact critical headers are absent. Absent columns cannot be evaluated as empty cells.
Export Agreement signed at before measuring signature timing	The exact header is absent for the export (24 selected; 5,459 all supplied). Stage/payment proxies cannot establish signature dates or a directly observed signature rate.
Correct rejected dates at the source	5 rejected-date occurrences affect 5 / 24 selected leads. Counts include retained issues from merged records; the rejected values, not entire leads, were excluded.
Keep migrated records out of first-response SLA	23 / 24 selected leads are migration-flagged. Only 1 non-migrated leads form the response-coverage denominator.
Use only the dated, non-negative response sample	0 / 1 non-migrated selected leads have a usable response interval; 1 / 1 are excluded for missing dates or negative intervals. Stage proxies supply no response time.
Separate legacy source fallback from acquisition evidence	5 / 24 selected leads use sourceMethod = Marketing Source. This fallback may encode the capture route rather than the original marketing channel.

Sales / Overview

24 clean leads | Lithuanian citizenship by descent | Google Ads | All managers | Snapshot 2026-10-21 | All origins | SLA 60 min | Stale 7 days

Open-stage snapshot. Closed-won/lost history is absent; conversions and CAC cover this export only.

Assigned leads

24

24 open in snapshot

All leads in the current selection, with the chosen filters and cleanup mode.

Median first-contact time

n/a

0 native leads measured

Time from creation to recorded first contact, for native Kommo leads with both dates. The list is sorted from fastest to slowest; migrated leads are excluded.

P90 first-contact time

n/a

0% native timestamp coverage

Time from creation to recorded first contact, for native Kommo leads with both dates. The list is sorted from fastest to slowest; migrated leads are excluded.

Contact within 60 min

n/a

0 measured contacts

Only measured native contacts at or below the supplied SLA. Missing contacts and migrated history are not SLA passes and are excluded from this denominator.

Native leads without contact

0

Open native Kommo leads with no first-contact date or contact/work evidence. A contact stage can count as contact even without a date.

Overdue tasks

2

Open leads whose next task is earlier than the snapshot. A task exactly at the snapshot is not overdue.

Open leads without next task

21

Open selected leads with no next task, regardless of migration or contact history.

Clients

0

0 fully paid

Leads with payment evidence / all selected leads. Payment status can establish a client even when the first-payment date is missing.

Recorded CRM Sale

0

Client / signed / won records; CRM units

Recorded Sale for clients, signed agreements or won leads. Zero and missing amounts remain visible; the CRM currency is unspecified.

Recorded payment amounts

0

Payment 1 + Payment 2 + Payment 3 / CRM units

Sum all normalized Payment 1/2/3 amounts for selected leads, including zero and negative values. Missing/malformed amounts normalize to zero; Sale is never substituted.

Agreement sent / later

0

0 with validated sent date

Leads with agreement or payment evidence / all selected leads. A stage alone does not confirm signing or its date.

Median recorded touches

3

Only leads with Touches made

Median of recorded contact counts. Blank counters are excluded; a recorded zero is included. This is not an average or a count of replies.

De Civitate / Kommo / 2026-09-01 to 2026-09-30

Sales / Overview

⚠ This export contains no closed-won / closed-lost stages. Historical win rate and rejection rate are unavailable from this snapshot.

5 date values in this selection failed validation and are excluded from time-based calculations. Details are in Quality.

Creation cohorts use the original PlanFix date for migrated leads. Response-time comparisons use native Kommo leads only. Owner means the currently recorded responsible user.
